EDUCATION

University Of Southern California, Viterbi School of Engineering & Marshall School of Business

Bachelor of Science, ***Computer Science & Business Administration*** May 2023

GPA: **3.75**

SKILLS & CERTIFICATIONS

Languages: Greek and English (Native), French + Spanish (Basic)
DevOps: Kubernetes, AWS, OCI, Terraform, Git Actions, Ansible, Packer, Grafana, Prometheus, Helm
Coding Languages: Python, Java, C++, HTML, CSS, React.js, R, MySQL, JavaScript

WORK EXPERIENCE

P1 Technologies, Los Angeles, California May 2022 - Present

DevOps Engineer (AWS, OCI, Python , Kubernetes, Terraform, Grafana, CI/CD (Git Actions), Helm)

- **Led the migration of Skydance Animation to Oracle Cloud (OCI)—**containerized on-prem services, stood up OKE (Kubernetes), and standardized infra with Terraform, Ansible, and Packer, delivering 5× faster deployment times and a defined way to manage an entire organization's infrastructure.
- **Reduced deployment time by over 50%** for a storyboarding application (Flix) used by Warner Bros Animation by implementing a custom Helm chart for AWS EKS. The Helm-based solution streamlined the deployment process from managing over 10 separate Kubernetes manifests to a single Helm command, accelerating testing and improving development efficiency.
- **Architected and deployed a multi-region data manager tool** on OCI OKE, facilitating real-time collaboration for Skydance Animation. The tool outperformed traditional rsync methods, enabling seamless cross-region file synchronization between Europe, New York, and Los Angeles, significantly improving artist productivity and reducing lag in creative workflows.
- **Implemented a comprehensive monitoring and alerting system (P1 Protect)** using edge Kubernetes nodes, AWS, Grafana, and integrations with Slack and Jira. The system proactively monitors hardware status (fan, PSU), achieving an average response time of under 5 minutes. This has enabled the team to detect potential outages before clients report them, reducing downtime and enhancing client satisfaction.

VETO A.E., Athens, Greece September 2020–August 2021

Software Developer (HTML, CSS, Jscript, MySQL, PHP, CS-Cart)

- **Redesigned the front end** of e-commerce websites for various brands using CS-Cart, HTML, CSS, and JavaScript. Enhanced the UI/UX across all company platforms. Full List of Developed Shops
- **Boosted e-shop sales by over 110%** within 12 months by leading a shift in e-commerce strategy, focusing on improved user experience and streamlined product access.
- **Developed an internal data access tool** using PHP, MySQL, and front-end technologies (HTML/CSS/JavaScript). This tool integrates with an Oracle database and has become the most utilized software by employees and B2B customers.

McCann World Group Advertising Agency, Athens, Greece May 2020–August 2020

Front-end developer (Javascript, Vue.js, CSS, HTML)

- **Implemented new frameworks** (Laravel, Vue.js) into ongoing projects, enhancing front-end performance and maintainability.
- **Designed front end** for a major campaign project using Vue.js, JavaScript, HTML, and CSS, collaborating remotely with clients and marketing teams to deliver the final product (www.amitamotion.gr/playmotion).

PROJECTS

Lino: Founder @wear.lino March 2022 – May 2023

- **Established a linen brand**, managing the design, production, and sale of linen clothing between Greece and Los Angeles. Successfully launched and scaled the brand.

Expat Society: *VP of Events* August 2022 – May 2023

- **Managed a budget** of over $200,000 and led a team to execute 8 successful events, selling over 5,000 tickets in one year. **Oversaw event planning and operations**, handling vendor relations, marketing, and logistics for large-scale social events.
